CONNECTING THE FUTURE

Mukesh Panjwani I CEO

“The future is a canvas awaiting the strokes of those who believe in the beauty of their dreams”. At MX MDR Technologies Ltd, we embody this ethos with our unwavering commitment to connecting the future. As the torchbearer of excellence, MX, which emanates from the magic of Xcellence, was founded in 1978 by the visionary entrepreneur, Mr. Mukesh V Panjwani.

Pioneering the industry, MX stands as the leading manufacturer of electronics, Audio Video cables, Electronic, and Electrical accessories. Our state-of-the-art manufacturing unit is nestled in Vasai, Dist. Palghar, Maharashtra, while our dynamic Experience center is based in Mumbai & Bangalore, India.

Since its inception, MX has been at the forefront, providing tailored electrical and electronic solutions for Architects, Interior designers, Furniture Manufacturers, System Integrators, Electrical Contractors, Service Providers, and Corporate Clients. Our network of distributor’s spans across India and our footprint extends to the Middle East, Saudi Arabia, Turkey, Nepal, Bangladesh, Sri Lanka, and South Africa.
"MX is not just a brand but a heritage of trust, credibility & sustained value creation.”

Our Principles:
- SERVICE
- QUALITY
- DESIGN
- INNOVATION
- MADE IN BHARAT

In 2016, MX Power emerges as a new vertical, illuminating the path with electrical power and cable management systems. Tailored for Residential, Industrial, Institutional, Hospitality, and Healthcare segments, MX Power is a testament to our relentless pursuit of progress.

Research & Development

1. Safety and Efficiency :
- Developing fire-resistant materials for outlet housings.
- Designing outlets with improved electrical conductivity for reduced energy loss.
- Integrating surge protection technology to safeguard against electrical damage.
- Implementing overload protection mechanisms to prevent overheating.
- Exploring new materials and manufacturing techniques to improve durability and longevity.

2. Sustainability and Environmental Impact :
- Developing energy-efficient outlets that consume less power when not in use.
- Exploring the use of renewable energy sources to power manufacturing processes.
- Reducing waste and minimizing the environmental impact of production.

3. User Experience and Innovation :
- Designing outlets with improved usability and accessibility features.
- Exploring new functionalities like USB charging ports and Quick Charge Technologies.
- Creating aesthetically pleasing outlet designs that complement modern home décor.
- Enhancing user convenience through features like tamper resistance and childproof protection.

4. Indian Regulatory Compliance and International Standards :
- Ensuring all MX power outlets comply with relevant national and international safety standards.
- Investing in testing and certification to guarantee product reliability and safety.
- Continuously staying updated on regulatory changes and adapting product designs accordingly.

Product Innovations

Multiple Socket:

MX revolutionizes power outlets with innovative Multi-Nation Sockets, including Indian, Universal, and UK variants. Our cutting-edge designs enhance compatibility and convenience, ensuring seamless connectivity for global users. Experience the future of power solutions & wireless charging.

Multi colors :

Our multi-colored and customizable power outlets are more than just functional tools; they are design statements. By embracing this innovation, you can transform your workspace into a vibrant and inspiring environment that reflects your unique personality and brand.

Quick & Wireless Charging :

We unveil our groundbreaking innovation by seamlessly integrating Qualcomm Quick Charge 3.0 for Power Delivery (PD) charging directly into our power outlets. Elevate your charging experience with MX's state-of-the-art technology, featuring wireless charging options for swift and efficient power delivery to your devices. Experience accelerated charging, thanks to our unwavering commitment to advanced solutions.

Made In Bharat :

We have played a pivotal role in India's growth through our participation in the "Make in India" initiative. By manufacturing homegrown power outlets, we contribute to the nation's self-reliance goals. These locally-produced outlets adhere to global standards, showcasing our commitment to quality and innovation. This not only boosts the domestic manufacturing sector but also positions us as a key player in India's technological advancement.

Function Modules

Childproof product

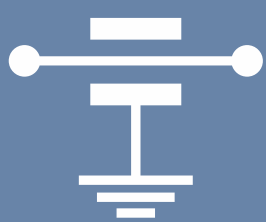
Our power outlets boast a childproof protection system, rigorously tested to meet international standards. Designed with utmost safety in mind, these outlets ensure a secure environment, adhering to globally recognized benchmarks. Rest assured that our childproof features provide robust protection, guaranteeing a safe and reliable electrical solution for your home.

Surge protection

We take power safety to the next level with built-in surge protection on our power outlets. Safeguard your devices from voltage spikes and surges, ensuring uninterrupted performance and extending the lifespan of your electronics. Trust us for advanced surge protection, providing peace of mind for your connected devices.

EMI/Noise filters with Advanced X3 Mov technology

Our power outlets stand out with EMI/Noise filters and Advanced X3 MOV technology, ensuring a clean and efficient power supply. This innovative combination eliminates electromagnetic interference and unwanted noise, guaranteeing a reliable and stable power source for your devices. Experience optimal performance and protection with our advanced technology.



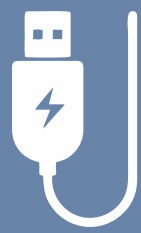
Circuit Breaker

Redefines safety with our power outlets featuring a built-in circuit breaker switch. This smart addition ensures immediate protection against overloads and short circuits, providing a reliable shield for your devices and peace of mind for users. Experience a new level of safety.

CONNECTING THE FUTURE

USB Charging

Enhance convenience with built-in USB slots on our power outlets. Charge your devices directly without the need for adapters, providing a seamless and efficient charging solution. With multiple options like USB A 3.0, USB A+ C, and USB C up to 95 watts power. Experience the future of connectivity with us, where power and versatility meet in a single outlet.



Safety Shutter

Safety is paramount with our power outlets featuring innovative safety shutters. These built-in shutters provide an extra layer of protection, preventing accidental contact with live components. We ensure peace of mind, prioritizing safety in every socket for a secure and worry-free power experience.

BIS Standards Indian Socket

We prioritize safety by featuring BIS (Bureau of Indian Standards) standard Indian sockets in our power outlets. Compliant with strict standards, these outlets offer a secure and reliable connection for your electronic devices, ensuring both safety and performance.

Universal Sockets & UK sockets

Our power outlets feature Universal Socket, offering a versatile solution for global connectivity. This innovative feature accommodates a variety of plug types, including the UK plug, making it convenient for users worldwide. Experience seamless compatibility and enhanced flexibility with Universal Socket – where power meets adaptability

Modular Power Tracks
MX NUEVO C55
RECESS MOUNT POWER & DATA TRACK

The MX C55 Recess mount modular track series is designed for straightforward recessed mount installation, catering to power, data, and multimedia needs while featuring a cable management compartment. Ideal for applications such as boardrooms, conference rooms, and meeting room tables, it comes highly recommended for office and original equipment manufacturer (OEM) segments in system furniture. Customizable to any plug or multimedia socket configuration, and adjustable to fit specific length requirements.

SPECIFICATION

Electrical

Rated Voltage : 250V— Single-phase

Rated Current : 32 Amps (Max)

Frequency : 50 / 60Hz

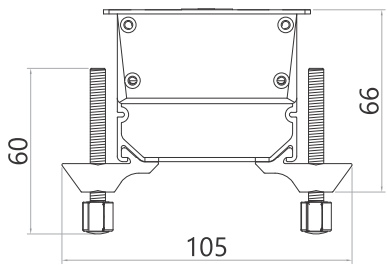
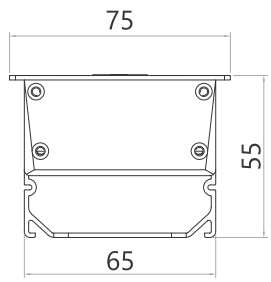
MX NUEVO C55

In-Surface Power Distribution Unit

Engineered for effortless recessed installation, the C55 In-surface power distribution unit series seamlessly integrates power, data, and multimedia connectivity within a dedicated cable management compartment. Its sleek aluminum alloy housing makes it suitable for a variety of workstations and executive tables, making it a highly recommended solution for office and system furniture OEMs.





MX NUEVO C34

In-Surface Sleek Power Distribution Unit

MX C34 In-surface power distribution unit series is engineered for simple recessed mount installation to carter power, data and multimedia in a low depth profile. A perfect solution for recessed power & data installations allowing easy access to power for tables, desk, and partitions. Plastically sleek and perfect to go with the home & office workspace.

Access Flaps

The access flap features an integrated frame and soft closure, offering single-sided access to an electrical outlet while seamlessly blending into your workspace. Its compatibility with an integrated bottom box provides additional flexibility, and USB charging ports conveniently located on the side cap ensure effortless charging for your electronic devices. This versatile flap is ideal for various applications, including workstations, meeting room tables, conference tables, supervisor desks, and even classroom desks, enhancing functionality and accessibility in any environment.
